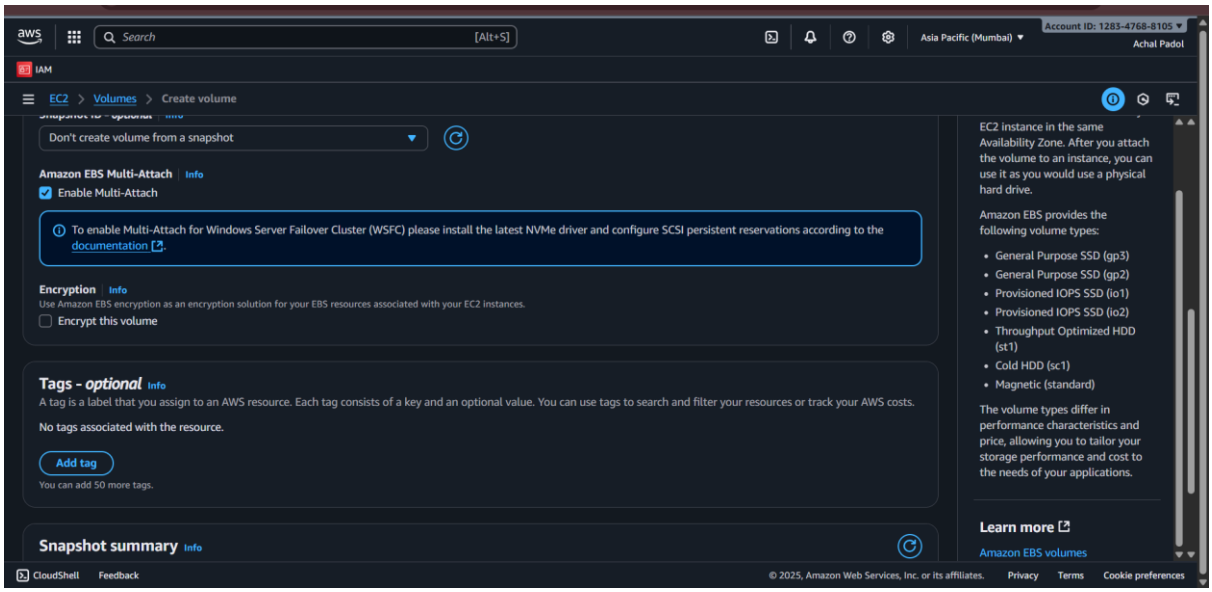
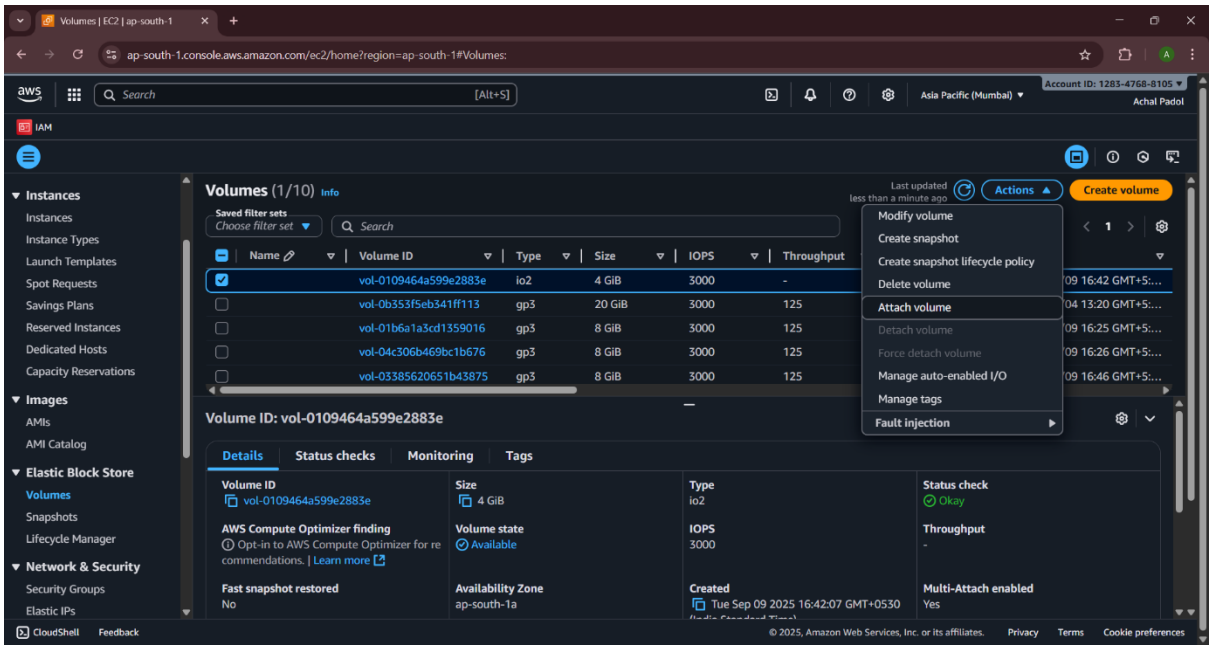
TASK: 11

- Attach EBS volume to multiple instances.
  - It is possible only in the provisioned SSD (io1) (io2)
  - Multi attach is not support in the free tier account
  - Multi attach is works only with Nitro-based instances.
  - Not Nitro-based: t2, m3, c3, r3.
  - Nitro-based : t3, t3a, t4g, m5, m6

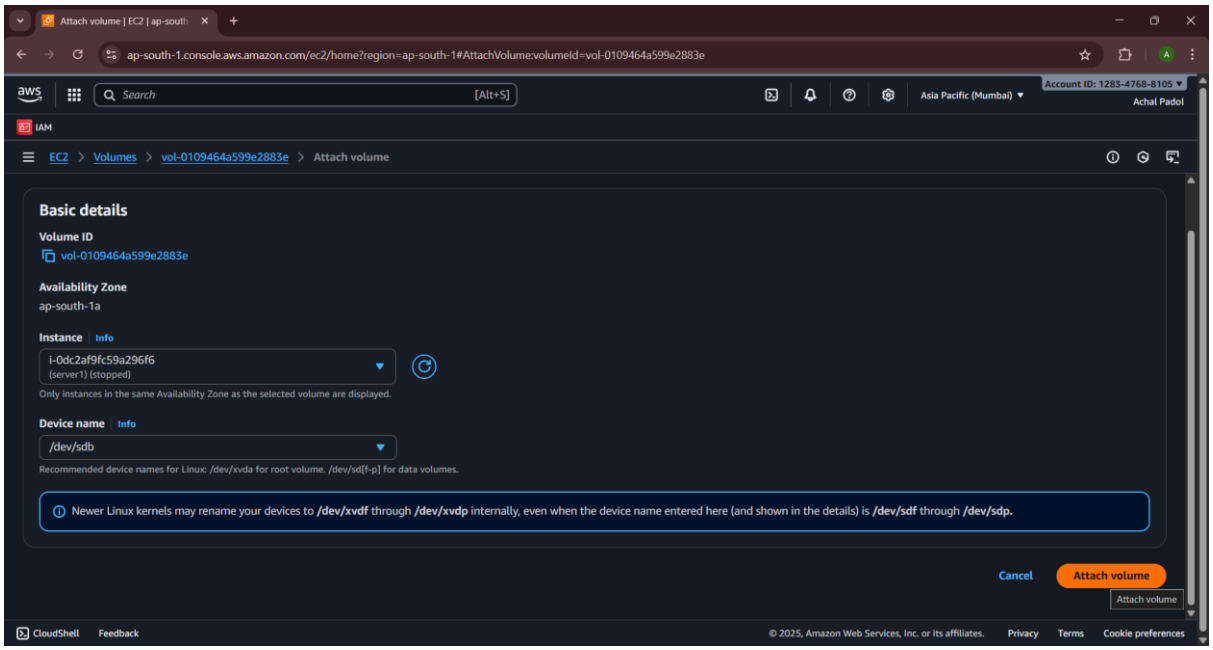
Step1: Create EBS volume choose provisioned IOPS , select AZ and the enable Multi Attach.

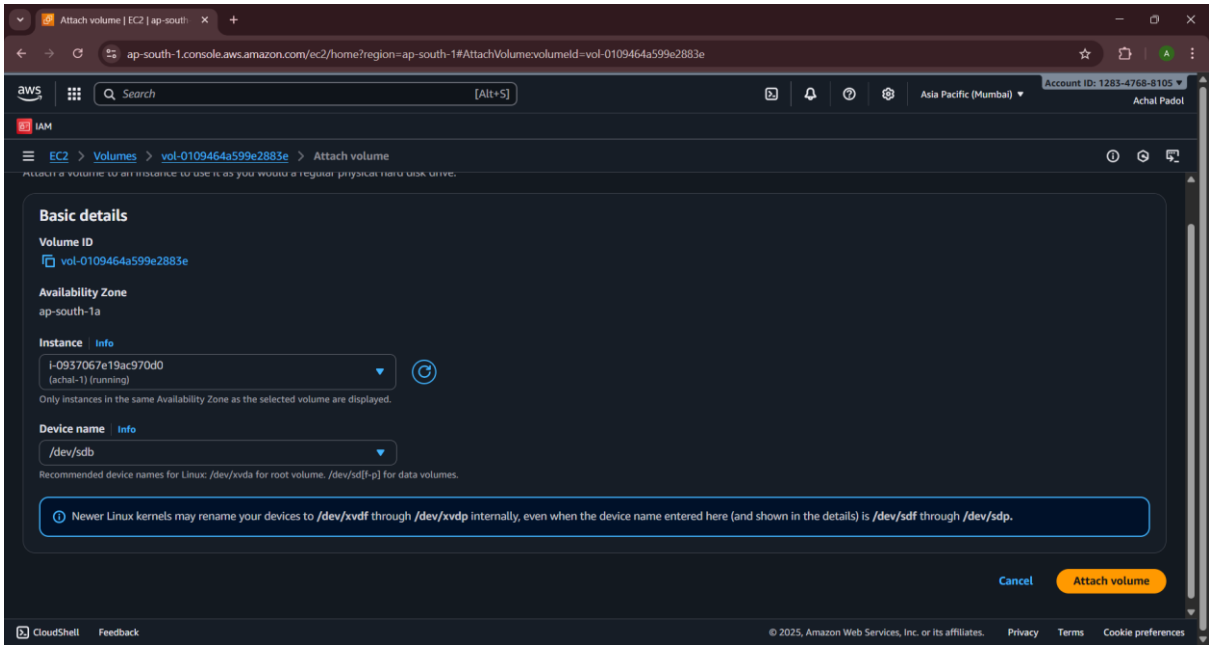


Step2: Attach volume to the Instances.



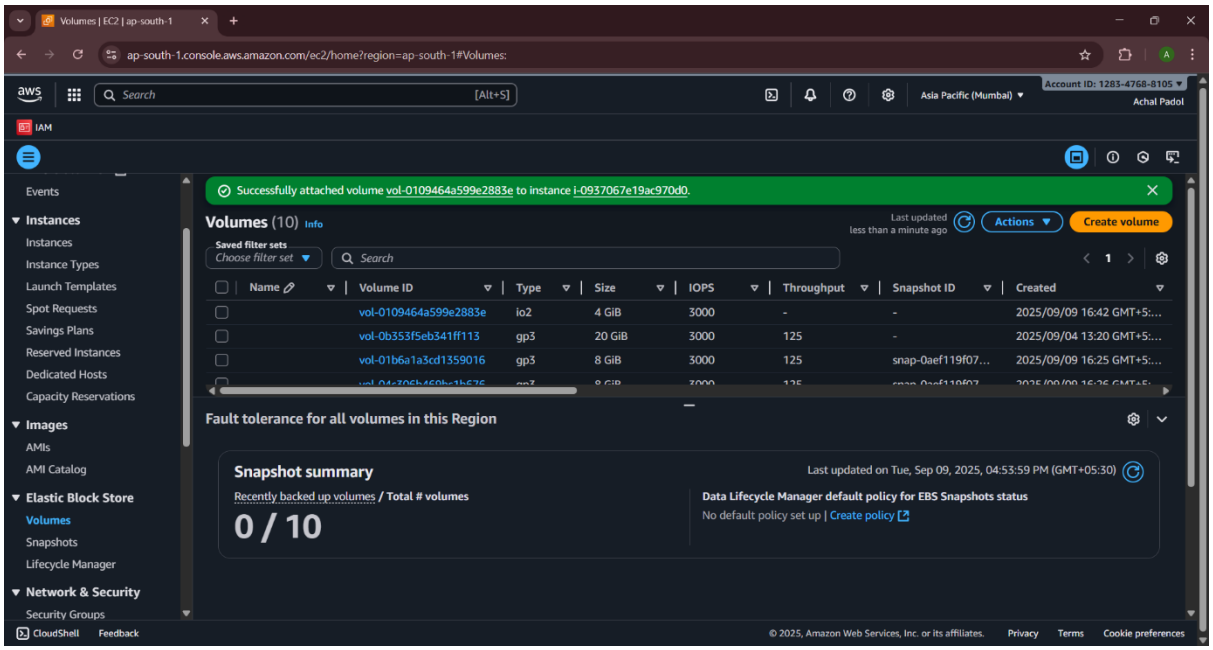
Both volume and instances should have in the same AZ.





Step3: Do this step again and again

Note: Volume is attach to the multiple Instances

That’s all are the steps to attach one volume to multiple instances.


Volume is attached.
