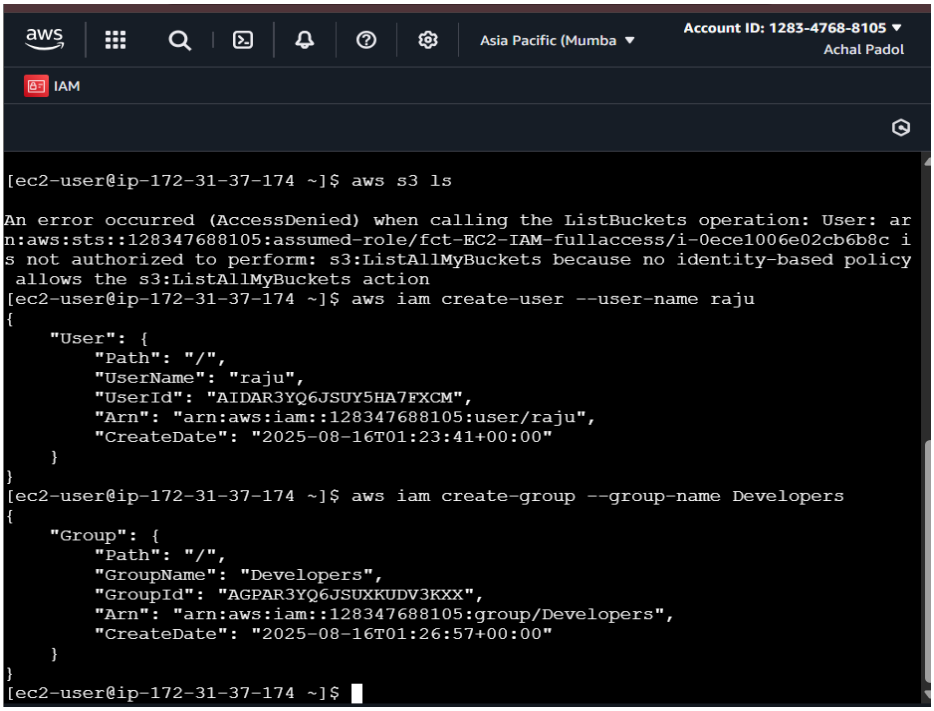
Task:3

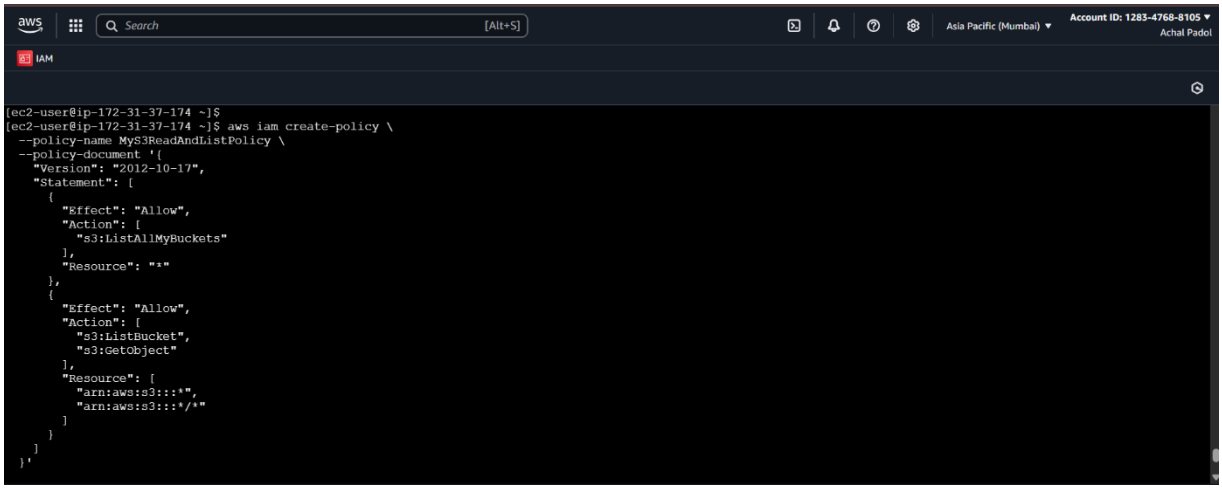
- Create IAM user and group using CLI.

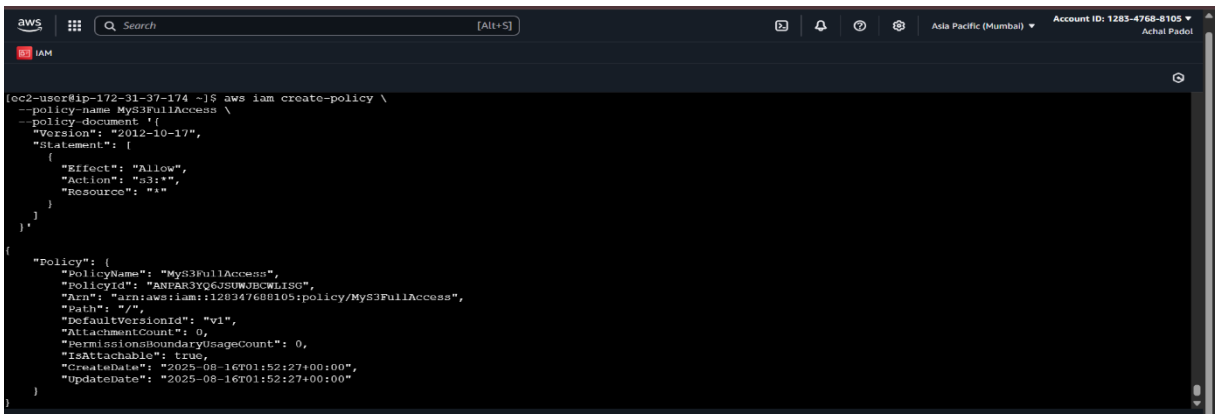
  Ans:



- Create Policy using CLI.

  Ans:





- List Attach Policy to user.

  Ans:

```
update-group                                | update-login-profile
update-open-id-connect-provider-thumbprint | update-role
update-role-description                     | update-saml-provider
update-ssh-public-key                       | update-server-certificate
update-service-specific-credential          | update-signing-certificate
update-user                                 | upload-ssh-public-key
upload-server-certificate                   | upload-signing-certificate
wizard                                      | wait
help

Invalid choice: 'list-attach-user-policies', maybe you meant:

  * list-attached-user-policies
  * list-attached-role-policies
  * list-user-policies

[ec2-user@ip-172-31-37-174 ~]$ aws iam list-attached-user-policies --user-name raju
{
    "AttachedPolicies": [
        {
            "PolicyName": "MyS3ReadAndListPolicy",
            "PolicyArn": "arn:aws:iam::128347688105:policy/MyS3ReadAndListPolicy"
        }
    ]
```

- Create roles using ClI.

  Ans:

```
[ec2-user@ip-172-31-37-174 ~]$ vi trust-policy.json
[ec2-user@ip-172-31-37-174 ~]$ aws iam create-role \
  --role-name EC2S3AccessRole \
  --assume-role-policy-document file://trust-policy.json

{
    "Role": {
        "Path": "/",
        "RoleName": "EC2S3AccessRole",
        "RoleId": "AROAR3YQ6JSUYMWSRSPBN",
        "Arn": "arn:aws:iam::128347688105:role/EC2S3AccessRole",
        "CreateDate": "2025-08-16T03:05:39+00:00",
        "AssumeRolePolicyDocument": {
            "Version": "2012-10-17",
            "Statement": [
                {
                    "Effect": "Allow",
                    "Principal": {
                        "Service": "ec2.amazonaws.com"
                    },
                    "Action": "sts:AssumeRole"
                }
            ]
        }
    }
}
[ec2-user@ip-172-31-37-174 ~]$
```

- User Added into group verify.

  Ans:

```
  aws <command> help
  aws <command> <subcommand> help

Unknown options: Developers

[ec2-user@ip-172-31-37-174 ~]$ aws iam get-group --group-name Developers

{
    "Users": [
        {
            "Path": "/",
            "UserName": "raju",
            "UserId": "AIDAR3YQ6JSUY5HA7FXCM",
