TASK 12

- How to make an EBS volume mount permanent on an EC2 instance.

  Step1: create volume

  Step2: Attach to the instance

  Step3: make partition xvdb1, xvdb2, xvdb3

  Step4: Give file system

  Step5: check file system by using blkid command

  Step6: mount storage type to /mnt- mount /dev/xvdb1 /mnt

  Step7: used command – nano /etc/fstab
  Step8: UUID "1910133d-11fa-45f0-aba1-c1fe34455219 /mnt ext4 default noatime 0 2 After that reboot and connect again and check mount is a permanent.
